

IM-Mounting

type 10-IM-250-A

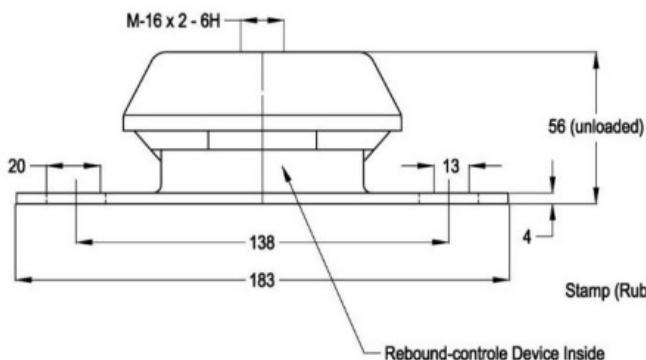

Max. 200 kg - 10 mm - 5 Hz

IM Mountings type 250 are extremely suitable for the installation of refrigeration technical equipment. These compact vibration isolators are easy to install and mount and provide high-vibration isolation. The internal buffer takes care of it for the movement of the flexibly installed installation in three directions is limited.

The IM Mountings are available in various rubber hardnesses and provide a corrosion-resistant coating for outdoor installations. Also available with M10 and M12 threaded holes. Scope of application: chillers (screw, piston, centrifugal, and absorption machines), condenser units, fridge/freezer combinations for refrigerated furniture, etc.
