

FOAM - SANDWICH PANEL

DESCRIPTION

SANDWICH PANELFOAM is a super light sandwich panel with a structure of a lightweight core and waterproof bonded marine plywood on each side. The plywood as well as the foam can vary in thickness and weight. We use mainly PU or PVC foams with various densities.

SANDWICH PANELS FOAM have excellent construction properties. The panels are made in standard sizes as well as special structures.

Our **SANDWICH PANELS FOAM** are used in motor and sailing yachts, buses and coaches, houses, offices, theatres and furniture.

Structure Foam:

9 mm	2-5-2	app. 2,75 KG/m ²
